Pentru frontend recomand Visual Studio Code

!!! Proiectul Angular se ruleaza din terminal/ command prompt
Pasi: duci cmd in folderul in care se afla proiectul (cu cd si locatia) si introduci comanda ng serve
Instalati tot din cmd in folderu ala si Angular Material cu: ng add @angular/material (eu am instalat deja si i-am dat push cu material configurat deja deci s-ar putea sa nu trebuiasca sa faceti si voi asta, rulati programul si daca atunci cand deschideti site-ul apare un icon cu o casa inseamna ca merge is nu trebe sa faceti nimic)

🏠 Proitect tW

Adresa la care ruleaza proiectul: http://localhost:4200/

```
C:\>F:

F:\>cd Proiect_TW/FrontEnd/proiect-TW

F:\Proiect_TW\FrontEnd\proiect-TW>ng serve
√ Browser application bundle generation complete.
